WORKSHOP: Agentic AI Research Workflows: getting your work done faster

September 17, 2025
15:00 to 17:00
Seminar Room

Researchers today face an overwhelming flow of information. Reading papers, extracting an structuring data, and searching for relevant insights. These tasks often leave little time for th time consuming activities that matter most: prototyping, building, and experimenting.Thi introductory workshop explores how agentic AI workflows can help automate some of th research processes and free up more time for meaningful work. Through hands-on training participants will learn how to Interact with agents and external tools to streamline researc tasks, integrate environments and tools into a functioning workflow and finally us Axiomatic's AI-powered tools for basic research and engineering support

Format & Requirements

No prior AI experience is required.

Please bring a computer with Python installed (e.g., via Anaconda) and the free version of Cursor IDE.

All other tools and credentials will be provided and set up during the workshop.

Trainers:

FRANK SCHAEFER
TYMOTEUSZ SALAMON
AITOR LOPEZ
PIM SCHOOLKATE

Hosted by: Prof. Dr. Frank Koppens
